PROFESSIONAL SUMMARY

Full-stack engineer specializing in scalable e-commerce, supply-chain, and SaaS platforms. Architected production systems serving 80,000+ users with measurable performance gains across the React/Next.js, PostgreSQL, and CI/CD stack.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Python, Java
- Frontend:** Next.js, React, Redux Toolkit, React Query, Tailwind CSS, shadcn/ui
- Backend & APIs:** Node.js, Express.js, NextAuth.js, JWT, RESTful APIs, Microservices
- Databases & ORMs:** PostgreSQL, MongoDB, MySQL, Firebase, Prisma, Sequelize
- Cloud & DevOps:** GCS, AWS (S3, Lambda, RDS), Docker, GitHub Actions (CI/CD), Nginx
- Architecture & Integrations:** Feature-Based & Clean Architecture, RBAC, Real-time (CRDT/Yjs), Google OAuth, Stripe, Resend, WhatsApp API
- Domain:** E-Commerce, Supply Chain, POS Systems, Inventory Management

EDUCATION

- University of Moratuwa** June 2022 – Present
B.Sc. (Hons) in Information Technology and Management Moratuwa, Sri Lanka
- CGPA: 3.5 / 4.0 | Coursework: Enterprise & Mobile Dev., AI & ML, Object Oriented Analysis, SE Methodologies

WORK EXPERIENCE

- APP360 (Pvt) Limited** February 2025 – August 2025
Software Engineer - Intern Colombo, Sri Lanka
- Built production features for a platform serving 80,000+ users, including inventory management, cashier operations, caregiver scheduling, and attendance tracking
 - Migrated the application to the Next.js App Router (improved routing/SSR); developed a secure JWT + RBAC auth system with middleware guards and GCS signed-URL document uploads
 - Delivered 55+ incremental builds with release notes and client-facing UAT demos; mentored a junior intern on version-control workflows and UI/UX quality
- DOC-Q - Online Doctor Bookings** March 2024 – June 2024
Software Developer - Web (Volunteer) Remote
- Implemented a location-based doctor search feature, improving service discoverability and overall user experience
 - Delivered features with Node.js, Express.js, and Firebase in a cross-functional team with weekly sync-ups

PROJECTS

- Total Supply - Enterprise Supply Chain Platform** | Case study January 2026 – Present
- Next.js, TypeScript, PostgreSQL, Prisma, GCS.* Multi-role platform unifying e-commerce and service workflows behind an RBAC-governed REST API; cut hot-path query time from 250ms to 87ms and storage cost by 40% via Prisma indexing and signed URLs. **Concepts:** RBAC, middleware guards, Prisma schema design, composite indexing, N+1 elimination, signed URLs, REST API design
- Samwoostore - E-Commerce Platform** | Case study October 2025 – December 2025
- Next.js, Redux Toolkit, React Query, PostgreSQL, Docker, GitHub Actions, Nginx.* Production B2B/B2C platform (live at samwoohub.lk) with dual auth (credentials + Google OAuth, JWT) and Dockerized CI/CD for zero-downtime deploys; 40% faster loads via caching. **Concepts:** OAuth 2.0/OIDC, JWT sessions, RBAC, Docker multi-stage builds, GitHub Actions CI/CD, Nginx reverse proxy, zero-downtime deployment, React Query caching
- Prompt Copilot - AI Prompt Management Ecosystem** | Case study December 2025 – January 2026
- Next.js, TypeScript, Prisma, Chrome (MV3) & VS Code Extensions.* TypeScript monorepo syncing one prompt library across a Next.js + Prisma web app, a Chrome extension, and a VS Code extension behind a shared REST API and auth. **Concepts:** TypeScript monorepo, Chrome Extension Manifest V3, service workers, content scripts, message passing, VS Code Extension API, WebView API
- Rag Release - Collaborative Book Publishing Platform** | Case study September 2024 – July 2025
- Next.js, Express.js, PostgreSQL, Sequelize, Yjs/Tiptap, AWS S3, Stripe, Docker.* Collaborative publishing platform with real-time co-editing (Yjs/Tiptap) and an author-to-publisher workflow, built as a Next.js frontend over Express microservices (auth, book, media). **Concepts:** Microservices, clean/layered architecture, CRDTs (Yjs), real-time collaborative editing, JWT + bcrypt auth, Sequelize ORM
- Additional Projects**
- Student Welfare Management System** - team-led platform for 4,000+ students (Mahapola scholarship + disciplinary tracking), live at ems.vpa.ac.lk; *Node.js, Express.js, React, PostgreSQL.* Case study
 - Internify** - intern tracker for 450+ students; *Node.js, TypeScript, React, PostgreSQL.* Case study
 - POV Globe** - IoT persistence-of-vision LED display; *C++, ESP32, WS2812* (RMT driving, rotational timing). Case study
 - Master Todo** - React + Firebase task app; *React, Vite, Firebase, Tailwind.* Case study

ACTIVITIES & LEADERSHIP

- Open Source Contributor, SEF Global (2022–Present) Hacktoberfest Participant (2022–2024)
- Microsoft Learn Student Ambassador (2023–2024) IEEE Student Branch, UoM, Coordinator (2022–2023)
